

TITLE OF THE INVENTION  
EOSINOPHIL EOTAXIN RECEPTOR

ABSTRACT OF THE DISCLOSURE

- 5           The eosinophil eotaxin receptor has been isolated, cloned  
and sequenced. This receptor is a human  $\beta$ -chemokine receptor and has  
been designated "CC CKR3". The eosinophil eotaxin receptor may be  
used to screen and identify compounds that bind to the eosinophil  
eotaxin receptor. Such compounds would be useful in the treatment and  
10 prevention of atopic conditions including allergic rhinitis, dermatitis,  
conjunctivitis, and particularly bronchial asthma.
